

## **BLANK BLANKSKI**

### **PROFESSIONAL SUMMARY**

Alex Yesufu is a multi-skilled agile software developer with over 5 years of experience in SDLC, from product ownership to programming. He has a bachelor's in Statistics and a strong knowledge of business development. His passion for analyses has sculptured him into a very data driven individual. Besides his traditionally schooling, Alex is also a graduate of various software developer programs in Java, Python, and JavaScript. He has perfectly transferred his learning to actual productive application in various completed projects. He demonstrates extreme comfortability using numerous Java frameworks, such as Spring, Hibernate, JDBC and Angular. He is capable of building python applications using Django and Flask frameworks, and has knowledge of cloud computing with the 3 major platforms, Azure, AWS and Google.

He is a self-driven, and proactive individual, who's always willing to apply knowledge gained from both classroom and work environment to deliver optimum performances. He will thrive in a reputable firm, which offers new challenges, while increasing his knowledge base to improve functionality; efficiency; and productivity in today's dynamic world.

### **TECHNICAL SKILLS**

**Programming:** Java, Python, JavaScript, HTML5, CSS3, SQL, Spring, Spring Boot, JDBC, Jackson, JPA, JQuery, Node, Webpack, Babel, Maven, NPM, React, Redux, Django, Flask

**Software:** Eclipse, VS Code, Git, GitHub, Cmdr, PGAdmin, Docker, Intelij, Postman, Insomnia, Jira, Asana, Jenkins, Kubernetes

**Databases:** PostgreSQL, MongoDB

**Cloud:** AWS, Azure, Google Cloud

**Operating Systems:** Windows

### **PROFESSIONAL EXPERIENCE**

**COOK SYSTEMS – Memphis, TN**  
***FastTrack Developer***

**04/19 – Present**

#### ***Mock Twitter-API***

- Developed a Java Application to model social media platform Twitter, working with a 3-person team of developers.
- Utilized Spring Boot to initialize the application and added all necessary dependencies for MapStruct and Lombok.

- Set up JPA properties to link with a PostgreSQL database for the repository.
- Created 3 main entities to depict User, Tweet, and Hashtag. As well as classes for user profile and credentials.
- Included all necessary exceptions and validations for user credentials. Utilizing exception classes and controller advice.
- Created controllers and mappers to interact with the various onion layers of the application.
- Set up CRUD and RESTful API endpoints methods to interact with the database and tested with Postman.
- 

*Environment: Java, Spring Boot, Postman, Github, Git*

*Environment:*

### **Rideshare Company (Confidential) – Phoenix, AZ**

**05/22 –**

*Agile Product Owner*

- Planning and monitoring the entire SDLC for the project to ensure all product features are accomplished.
- Develop compelling user stories to simplify and describe the features and capabilities of the app.
- Constantly monitor the product backlog for every sprint, to ensure tasks are duly completed.
- Present at scrum rituals to supervise product backlog refinement.
- Ensure 100% stakeholders' satisfaction by addressing important feedbacks.

### **Nucamp Project – Phoenix, AZ**

**04/22 – 09/22**

*Python Developer*

#### **Project 1 (Food Flasher)**

- Designed the ORM and utilized Python OOP in back-end programming of a food delivery application, that lets users bundle from different restaurants.
- Created a RDB with PostgreSQL using pgAdmin GUI to store user data
- Created RESTful APIs to interact with the database and tested with Insomnia.
- Containerized using Docker and Flask framework.

- Utilized Ubuntu sever for hosting.

*Environment: Python, Django, Git, Github, AWS*

*Python Developer*

Project 2 (Cities Trivia Game)

- Created a simple back-end Trivia game that lets players select the correct fictitious city from a dictionary of cities.
- Set up 3 game play modes to determine player difficulty and counter to store high scores.
- Utilized packages to import custom made function for game play.

*Environment: Python, Flask, Git, Github, PostgreSQL AWS*

**Amazon LLC – Phoenix, AZ**

**05/21 – 01/22**

*Central Flow Lead (L4)*

- Minimized fulfillment cost for my designated Fulfillment Center (FC) by more than 30% while maintaining customer experience.
- Aided development of advanced and intuitive automated flow control for FC operations. By providing insights to the Amazon Fulfillment Technology (AFT) team.
- Prevented customer experience risk, SLA failure risk, or deviation from Standard Work by communicating workflow status with FC Managers.
- Developed shift plans based on operations requirements, by executing advanced SQL queries and utilizing VBA.
- Ensured more than 90% performance by managing workflow settings for multiple process paths in inbound operations for the FC.

**Amazon LLC – Nottingham, MD**

**12/20 – 05/21**

*Transportation Associate (L3)*

- Ensured timely zero-defective product arrival and departure to and from the FC, by managing driver check-ins into the yard.
- Maintained employee and driver safety, by promptly calling out all non-safety compliant actions on the yard.
- Upheld DOT regulations within the yard by ensuring drivers' strict compliance with company policies and procedures.
- Prevented accidents, mishaps and delivery delays, through scheduled inspection reports on equipment and escalate for any maintenance requirements.
- Reduced possibility of theft or property loss by carefully carrying out periodic yard audits, to check for mismatch and maintain accountability.

**Amazon LLC – Baltimore, MD**

**11/19 – 12/20**

*Fulfillment Associate (L1)*

- Constantly achieved over 100% productivity expectations while maintaining 100% quality through personal improvised techniques.
- As a Learning Ambassador I trained over 100 new hires and cross trained more than 50 Amazon Associates (AA) for IB Stow and Problem Solving.
- Facilitated employee retention and improved AAs experience by working with assigned Managers for a special team engagement called 'Lunar Landing'.
- Over 50% of my trainees constantly performed at 100% productivity with 2 of the AAs receiving promotions within their first 6 months.
- Highest performing Learning Ambassador for 7 weeks in a row.
- Helped my team to consistently accomplish one of the lowest cumulative team quality DPMO's on my shift, by coaching low performers.

**Chrome Solutions – Towson, MD**

**09/19 – 11/19**

*Data Analyst*

- Improved sales lead conversion by 21% for primary client Verizon Fios, by collating and analyzing customer data using Excel and Tableau.
- Increased customer retention by more than 15% in the region, by maintaining a CRM system for new and existing Verizon Fios customers.
- Set company apart from competitors, by brainstorming ideas and executing strategies based on trends.
- Prepared and optimized communication material for interaction with new and existing customers based on customer data.
- Analyzed data periodically to ensure clients' expectations were met.

**Maheen Inc. – Baltimore, MD**

**11/18 – 08/19**

*Business Analyst*

- Improved production, by utilizing insights from aggregated data to model operations.
- Developed KPIs, tracked progress, and made reports to key stakeholders.
- Reduced costs by 6% through periodic financial analysis to evaluate reports and advise on smarter resource allocation.
- Improved significantly, client experience by 21%. Through monitoring and evaluating processes to seek areas of improvement.

**Webloft Concepts – Lagos, Nigeria**

**11/16 – 12/19**

*Agile Business Development Manager (Part-time)*

- Reduced cost by up to 11% in 2017, through careful management of product backlog, and efficiently reprioritizing.
- Expressed product vision to developers and defined 80% of product goals, by owning planning and scheduling of 3-week sprints.
- Achieved buy-in from stakeholders, by ensuring the created user story acceptance criteria were met.

- Ensured the company remained on top of trends, by promptly reporting insights gained from reviewed user feedback and research conducted.
- Eliminated inefficiencies from documented existing procedures, and designed new efficient workflows and operations charts.

**Mediacraft Associates – Lagos, Nigeria**

**10/14 – 11/15**

*Business Development Manager*

- Maintained customer satisfaction through insights from periodic perception audits.
- Improved client portfolio by 5%, by generating and converting new business leads.
- Analyzed useful industry customer data to advise on areas of improvement.
- Constantly updated all company's touchpoints (website, corporate profile, portfolios)
- Ensured optimum stakeholders' engagement through constant communication.
- Created and maintained company's social media presence, by building a team and developing workable ideas for engagements.

**EDUCATION**

**Cook Systems FastTrack Java Program – Memphis, TN**

**10/22 –**

*Concentrated Java Frameworks and developer tools training*

**Nucamp Modern Software Engineering with DevOps – Phoenix, AZ**

**07/22 – 09/22**

*Containerization and Cloud Computing with Azure, AWS, and Google*

**Nucamp Advanced Back-end Boot Camp – Phoenix AZ**

**04/22 – 06/22**

*Data Structure & Algorithm with PostgreSQL and Python*

**Nucamp Fundamentals of Web Development – Phoenix AZ**

**03/22 – 04/22**

*Programming with HTML5, CSS and JavaScript*

**Duke University (Coursera) Web Development – Los Altos Hills CA**

**06/21 – 08/21**

*Programming with HTML5, CSS and JavaScript*

**Udemy Python for Data Science and Machine Learning – Baltimore MD**

**05/19 – 08/19**

*Introduction to Python Libraries*

**University of Ibadan – Oyo State, Nigeria**

**05/05 – 11/09**

*Bachelor of Science: Statistics*
